RICH DAD POOR DAD

WITH UPDATES FOR TODAY'S WORLD
— AND 9 New Study Session Sections

ROBERT T. KIYOSAKI

1. Dream Big

You cannot earn millions by just
dreaming of a small job,

Plan and dream big ventures
and play with heart.

2. Pay Yourself First

Every month, first invest in your income-generating assets,
The rest of expenses should be next to it.

3. Winning means not being afraid to lose

Never be afraid to take calculated risks.

Those who always play it safe never make big fortunes.

4. Gain Financial Knowledge

Learn about investing, markets, accounting, sales and others.

It will help you make overall better financial decisions.

5. Acquire assets

Rich people acquire assets while poor accumulates liabilities,

Your choices will determine your fate.

6. Amount of money retained matters

It is not the amount of money you make,
It's the amount of money you keep
that matters.

7. Put your money to work

You cannot get rich with your money in
savings account,
Invest it in appreciating assets.

8. You are not born to work for others for lifetime

Most people consider this
slavery as their life,

Completely forgetting the life
possible beyond that.
