

DONALD TRUMP INTERVIEW

*We
develop a passion
for Teaching!*

Biden is just so bad he's the worst president in the history of our country you should make a diss track on him he we'll do something do you think that you're starting to soften your views on some of the networks that you may have not gotten along with in the past no they're fake news he had a street fight this past week and how did it work out how you think mr president i think he probably did pretty good i've watched enough of you fighting unidentified aerial phenomena in the sky we don't know what they are

do you it's very possible really
powerful stuff ai they made a
commercial me promoting a
product and it wasn't me and i
said did i make that
commercial rap beefs big rap
beef just happened drake or
[music] kendrick this is going
to be great i think so do this
all my life my whole life
anyway i how you doing how
are you boss is your brother
good yeah he's excellent you
have a good relationship with
him right with jake yeah yeah
we do now but it's not always
been like that it's always been
yeah i can imagine my brother

yeah it's good good tyson we
got yeah right who you got
when is it going to when is
that going to be november it
got rescheduled look mike
was fantastic but you know
mike's a little older now yeah
and you guys can fight yeah
we'll talk about that but you
guys can really fight
legitimately fight thank you
sir at first i said you know it's
so amazing because i always
thought like a ufc guy or a top
you know even contend ender
would be able to win at 75
years old you think but it
doesn't work that way yeah

the clock is still the clock
yeah yeah yeah i figured that
out with floyd as well yeah
how about that right i don't
know i mean it was i mean it
was even yeah have thought
he would have won that fight
that's what i thought was
some people still think he did
win that oh no way we got
gifts oh nice so for a lot of
money this thing oh no way
oh thank you president it up
here's this is is is this your
mug shot this is yeah can you
believe you're a gangster this
is what we're reducing no way
should we put them on now

crazy that's amazing and it
sells well elvis had one frank
sinatra had one this shirt but
we've eclipsed them a long
time ago we this is crazy it's
pretty cool is it cool i have to be
honest i'm jealous it's actually
you know i'm not sure if i
love or not but no no it is
what it is it it it happened that
might as well monetize it well
mr president people surely
love it they love the picture
they' rallied behind it they're
rallying behind you now well
they are more than ever and
you know we had the biggest
fundraising i think ever for any

candidate ever anywhere in the world in the last uh eight or nine days in hundreds of millions of dollars and too bad it couldn't have been done for other reasons but they they viewed the case is being so corrupt and so ridiculous you know every one of the legal pundits and you know their great guys when you look at dtz the whole group you know that whole group of people andy mccarthy uh jonathan turley greg jarrett every one of them they came out and they said there's not even a case here there's no case and

uh when they saw the jury instructions when they saw all the things that happened they and it's it's not like anybody's a friend of mine mark levin is an example they couldn't believe it so unfair you know it's a very unfair thing and because of that the fundraising numbers and the polls but the fundra that's sort of like a poll anyway right when you get right down to it but the fundraising numbers went uh i don't think there's ever been that much money raised that quickly you've become a martyr hundred of

millions of dollars insane
\$140 million in may that you
raised 35 million in just hours
after the verdi you have 58
million within a few hours
and that was in small
donations like \$71 something
average and over the over a
period of a week we even
went to san francisco now not
supposed to be that's the belly
of the beast right supposit but
they had thousands of people
on the street it was so positive
and they raised \$12 million
the the tech guys at one of the
houses david fantastic people
and they they were like uh

they gave me a lot of money
they they've never been into
doing that and i think it helps
that biden is just so bad he is
so bad he is the worst
president in the history of our
country so that helps too you
should make a diss track on
him yeah we'll do something
we'll do something i i actually
wanted to start there um go
ahead because because one
thing that i was i i just can't
seem to wrap my head around
it is uh you know you you got
you got these felony
convictions and a lot of them
like more than al capone right

and and and there was an uprising and people showed you their support with their donations and a lot of people are saying it it it points out that actually the unjust nature of of america's justice system so very unjust my question is like if that is your belief is if that is their belief why do you have the desire to give your time and energy to a a country or a system that's trying to take you down so i ran twice i did much better the second time than the first time and if i didn't i wouldn't have done this but we had it going like

this country has never been going before it was really good now it's really bad the worst border in history the worst inflation i think in history i think the history of the country the people are getting decimated by it all very flex you know all something you can fix you can fix it fast uh we were energy independent we're going to be energy dominant very soon all these things were happening and then we had a terrible result in an election and what happened was disgraceful and we can't

ever let it happen again but i
you know we have a little
expression it's right on that
hat make america great again
and we can do that make
america great again and this
guy is not going to do it this
guy's destroyed our country
uh when you allow 15 16 17
they have no idea where the
goda aways uh million people
in coming out of jails coming
out of mental institutions
insane asylum uh the asane
asylums all over the world the
mental institutions they're at
the lowest levels they've been
at it for years they're going to

be totally empty and uh you have terrorists coming into our country we're going to be paying a big price and we're going to solve the problem we're going to solve it relatively quickly but we have other problems too with energy with inflation he's been a disaster as a president he's the worst president we've ever had the good news is he makes jimmy carter look brilliant by comparison so jimmy carter is the only one that's happy with this well look i think that's why a lot of people are so obsessed with

you mr trump mr president
trump um well because you're
already a billionaire right you
you are essentially serving
these people and you don't
have to be doing it the
president being the president
seems like a very hard job
you you were at three
meetings just before this but
but i guess i'm asking like the
desire to run and attempt to
improve your country for
these things you're saying
yeah it comes from what just
the love of the country well
the people i i'll tell you when
you look at the people when

you look at the crowds i did a
a rally in new jersey we had
107,000 people there you saw
that last week uh we did one
in the bronx we had 20 25,000
people and this was in the
south bronx which is known
as a rough area and it was like
a love fest there was not even
like nobody even raised a
voice of descent in the whole
place it was like a big love
fest nobody could believe it
you saw that three four weeks
ago uh there's tremendous our
country has tremendous
potential but it's going down
the tubes very very rapidly

nobody has ever seen
anything like it the way it's
being run so bad and we can
change it we can change it
quickly we have a debate
coming up that'll be
interesting june 27th hosted
by one of your favorite
television networks cnn uh
well they gave me the option
they said would you do it and
they didn't want to do it he
didn't want to do it so they
gave me everything fake
tapper and uh lots of other
people that were going to you
know were involved uh on
cnn they wanted it to be

seated which i didn't like i
said we should stand and i
think we won that point but
uh i would have agreed to
whatever i had to agree to
because they didn't want to do
it uh they thought that i
wouldn't do it because it's cnn
but i've done plenty of cnn i
did a town hall not so long
ago with cnn that worked out
well but i think they'll be fair i
think they're going to try and
be fair i as fair as they can be
uh but i think it's important
for there to be a debate so
they said you want to debate
yep i'll i'll accept you don't

even have to tell me then they said cnn they said uh the different people that are involved but let's see what happens i used to get along with jake tapper we'll see what happens but it doesn't matter whatever it is it is that sentiment that cnn might be fair to you they might be is a is a bit of a departure from a 10% chance from your normal hardline stand do do you think that you're uh starting to come around or soften your views on some of the networks that you may have not gotten along with in

the past no they they're fake news fake news no they're so bad one of the good terms right fake news but uh i don't think so i thought maybe you know i had one with caitlyn collins about four or five months ago was one of the highest rated shows they've ever had and i really thought they were going to go maybe sort of in the middle but i was wrong about i i as i'm getting on and i'm hearing the way i'm being announced they said hey these people are playing hard ball they're making a big mistake but uh but the ratings

for this debate i guess will be quite quite good massive are you surprised by his decision to to face to face with you you mean the fact that they're willing to do it that biden's willing a little bit uh they didn't want to do it they thought i turned cnn down look cnn is the enemy and they thought i was going to turn cnn and tapper is uh you know one of the guys that uh i mean he when i'm making a speech so they're waiting for the nomination for months and months i got it in the quickest fashion nobody's

ever gotten a nomination so quickly and i'm making my nomination speech and they refuse to put it they're covering it for months and months now i'm actually making my speech i mean this is the big night i won the nomination and they refuse to put it on these are people that don't like trump but it's okay because i think it's important to have a debate or a number of debates actually the fact that you are so vocal as well especially on social media i think works in your favor um and personally i like that you come with

receipts sometimes i've seen
you pull them out of your no
understand will you have
receipts i like to do it well fact
fact checking is fun yeah i
know we check we're going to
we're going to check a lot of
things it's going to be an
interesting you will be
watching right i'll be watching
we just don't want to schedule
it around one of your fights
because please don't please
don't you do pretty well
thanks i'll be watching yeah i
always always see you you so
do you have by the way do
you ever a fight your brother

huh that's the question you
want you want to know
something i want to know
you're both you are both good
do you ever fight them thank
you uh uh i not in real life you
practiced a little bit we've
never even sparred really we
don't know we don't we i
think well did you beat him
off your whole life i didn't i
punched him in the face once
cuz he took my glasses but i
was willing to step in for
mike tyson uh when tyson got
sick and and had to postpone
his fight and and we actually
like ran it up the chain in

netflix it's hard for brothers to
fight though i think it's hard
not a big old bag like figure
out i think it's you don't think
so you love your brother well
me and jake decided that
obviously like we both come
from a place of love and
whatever the outcome would
be we'd have to be okay with
it but obviously i love my
brother the shots to the face
and you just just one time
though for for the rest of
history you know that night
goes down forever the
klitschko brothers never did it
no they never did it and they

were both good and they never did it they were very good but uh in fact nobody really figured out maybe who was better they've had they had some good fights they were tough right jake jake's tough and he's good but i'm want know he's very good and you're very good he had a street he had a street fight this past week against somebody from uh a squad you may know as the from the nek boys oh ri when you said you had it you had it out with him an actual street fight no no but but a friendly one or an

unfriendly one oh it was
pretty unfriendly was there
friendly i would call it a
waiver fight i had have a great
following though they're nice
guys we love them they have
such a you do i'm glad
because i you know i'm
getting myself into a position
they really are they did uh
dana white who's fantastic for
sure he said would you do the
nek bo didn't know who they
were i did it and i'm they have
a tremendous audience which
you can tell ferocious right
away i did dr phil the other
day we we love the nek boys

by the way the nek boy we're
talking about is like a kind his
his name is bradley martin
he's a big this guy because we
know kyle for guard kyle and
john shahi for years now great
bradley's this big 260 pound
you know bodybuilder and for
years he's called people out
i'm 260 i'm 260 i'll fight you
and got into it with logan how
did it work out how you think
mr president i think he
probably did pretty good i've
watched enough of you
fighting it was off camera you
know it was cool it was like a
duel like a good oldfashioned

just boys being boys no
cameras it was a real deal the
real deal and no rules was he
finished he quit he was he did
he quit yeah but we were very
impressed with him actually
he has no combat sports
experience stepped up he just
had he had muscle but not the
not the just no training just no
training you ever been in a
fist fight mr president
probably not i've been like
little ju nothing like i mean i'd
like to say yeah i fought my
way through school you know
i went through i fought my
way out of the wharton school

of finance i fought my but
you know we didn't have a lot
of fighters yeah we have
fighters but not that kind of
fighters uh but uh but i've had
a lot of fun i'll tell you we had
a great time over the years
i've been very much involved
with mike tyson mike a great
guy uh my son i have a
beautiful boy baron and he
loves mike tyson big boy big
boy huge he's a big boy 6' n 6
6'9 6' my pdf's at 67 and i
couldn't get him to play baset
boy play soccer he's a good
athlete too good student boy
for soccer but he's 6' n it's

insane goodlooking guy but
he is a tall one there's no
question i say baron i don't
want to take a picture next to
you it's uh neither do we
crazy we got to make him a
fighter maybe no no i don't
guys it's 2024 we want to
spend less and save more
that's just a fact but how how
are we supposed to save when
we're paying inflated prices
for everyday essentials like
gas and g gas and groceries
you look you can't just cut
those purchases out of your
budget but now thanks to my
2024 money back haack you

can get cash back from them
with upside upside is an
incredible app for anyone
who buys gas groceries or
dines out with upside you get
cash back on every single
purchase upside is my secret
weapon for staying on track
with my savings goals to get
started download the upside
app it's free also use my
promo code impulsive for 25
cents back on every single
gallon on your first tank of
gas next claim an offer for
whatever you're buying on
upside pay as usual however
you would with a credit or

debit card follow the steps in the app and get paid in comparison to credit card rewards or loyalty programs you can get three times more cash back with upside hey plus upside doesn't sell your personal information to third parties woo they know that your information is a vital part of their trusted relationship with you upside users are earning hundreds of dollars a year that's probably why they have a 4.8 rating on the app store so look download the free upside app use the code impulsive don't

forget the a and impulsive to
get 25 cents back on every
single gallon in your first tank
of gas thank you upside back
to the show we always see
you at the ufc fights yeah so
you're obviously a fight fan i
like it i really enjoyed i think
dana white is one of a kind
he's uh and he's been
generous to me he made a
great statement about me the
other day i saw that he that
was a nice statement well
because he had his back for i
did and and rightfully uh i
think you know the
expression everybody's

replaceable i'm not sure anybody could do the job he does is unbelievable he gets uh i met kabib kabib who's saw 29 and 0 and his father died and he just said that's it for me and you know his father was uh great at what he did and probably he never lost even a round i think he 29 know they say he never lost a round and i thought he was great and we got to speak he was just about my favorite guy and uh really talented the strickland was fantastic the other night i thought he was he was great striker he was

everyone wants to come out of the cage and meet you after they win they do yeah they do i'm very honored by it every time they win they jump out they jump out of that cage like it's nothing i don't know it's pretty high but they have no problem and when you enter the arena there's an eruption of cheers yeah but i remember cuz i've been going to ufc for a while like it all it wasn't always like that there was a very clear like shift in the perception of you do do you feel like you feel that now more than ever i don't

know you know i've i've done
it in vegas miami i do it with
them with dana dana wants
me to do that and i do it and
we it is an eruption he said
like he's never heard before
they actually stopped a fight
one of the fighters were're
walking out and there's a fight
going on and these guys are
really going at it and they
heard this crazy sound and
they stopped the fight they
they both stopped fighting
that looking over what
happened they probably
thought bad things were
happening to the arena but no

it's been uh it's been great and
and he is just some you know
somebody you have to really
respect i imagine you guys do
but he gets these fighters from
all over the world and they
are you know some really
talented people and i have
respect for fighters you know
when you can take 200 shots
to the face and then look
forward to the second round
you know it's interesting uh a
lot of wrestlers want to they
want to do the ufc thing but
they can't take the shots cuz
you know they're wrestlers i
was uh i've been with a lot of

them and because at the white house we honor the champ the national champion wrestlers and tennis players and sort of everything we have these but speaking to the wrestlers some of them there's somebody named bo nickel who i think is going to be great he's a fighter fantastic he was a all-american i think probably four years i'm not even sure he went to penn state and he's phenomenal as a fighter and you'll be watching him but uh but he doesn't mind if he gets h he doesn't mind some people don't want

that speaking of conflict and fighting since you left office the number of global conflicts has skyrocketed and i know kab talked to you about it quickly when you spoke with him um i think two weeks ago about uh president biden authorized the use of american weapons in russia which has now led to uh a fleet of russian warships coming towards cuba this week uh what is your what are your thoughts and concerns around our current handling of our relationship with russia well the russian

attack on ukraine would have never happened uh if i were president would have never happened it would it's just a shame all so many dead people you look at just the soldiers it's a half a million soldiers between the both countries uh but so many dead people so many towns and villages and buildings and all i mean magnificent culture just being wiped out you okay over that stuff's fall over sounds good nice book by the way nice book drug bestseller about the opiate epidemic which talk wow that's a great

that's a great topic because it's so sad to see what's happening so bad but uh it's a shame because it never would have happened it and it didn't happen during my four years didn't happen wouldn't have happened i got along very well with putin i got along with zalinski but it wouldn't have happened and uh and october 7th would have never happened and uh inflation would have never happened and the withdrawal the kind of withdrawal we were getting out of afghanistan with dignity and strength but

to get out the way i think it was the most embarrassing day in the history of our country and i actually think that the way afghanistan worked i i think that when putin looked at that he said well let's go in and you know who else looked at it president ch of china and he's looking he is looking at taiwan and he's drill drooling he's drooling over taiwan and so something could happen there uh we've lost a lot of respect they're laughing at us all over the world and that wasn't happening four years ago and

with you back in office you
think we'll get that respect
back yeah we'll get it back
we'll get it back what's your
relationship like with vladimir
putin i think very good but i
was tough with him you know
i ended the pipeline he built
it's called nordstream 2
nobody ever heard of
nordstream 2 till i got
involved and it was the
biggest project ever ever done
in russia i mean you know
this was a pipeline that was
going to supply uh oil and gas
to all over europe all over
europe germany in particular

and i said what are you doing
why are you doing this to
germany i said we're
defending you under nato and
you're going to you're paying
billions of dollars a month to
russia you mean we're
defending you and you're
giving the people were
defending you from we're
giving you uh the defense but
you're giving them money at
at massive amounts probably
the biggest project you know
most important one of the
most important projects i've
ever done i ended it it was
dead it was gone and then this

guy comes in and he approves
it but he kills keystone you
know the key keystone xl y
uh so it's uh it's sad but putin
said to me it's the biggest
thing you ended it you ended
the pipeline he said they all
say you and i are friendly but
i'd hate to see you as an
enemy but this was the
biggest you know this was
massive amounts of money
and everything that's how
came in huh you talk to him
like that oh no i had a very
good relationship that's a
good thing not a bad thing
and i'm trying to tell people

no it's a good thing they've got uh i i would give you the exact number but they gave a lot just under 2,000 nuclear weapons and we do also and when you have nuclear weapons and even if you don't have nuclear weapons getting along is good but be the tough one be the smart one get along is good i tell the press all the time no the fact that i get along with kim jong-un north korea that's crazy president shei that's crazy it's all good stuff getting along but uh nobody ever took money out of china like me i

took hundreds of billions of dollars out in the form of tariffs and taxes no other president took it not 10 cents and you know china built their military because of the united states the united states was giving them hundreds of billions of dollars a year in excess flow nobody's ever seen anything like it but we uh took out hundreds of billions of dollars from china and still got along with president she until co that was sort of that was a breaking point but uh no but he was a guy that i respected liked he

liked me and i liked him that's
a good thing not a bad thing
you know the press says oh
isn't it uh you say yeah he's a
leader he's a smart guy they
say smart man they say oh
trump said he was smart that's
yeah he leads 1.4 billion
people i say he's yeah it's a
little bit on the smart side but
i got along with him i got
along with kim jung er that
would have been a nuclear
war if hillary clinton had
gotten in office we would be
in a we would have been in a
nuclear war with north korea
he was ready for it um when i

was with him nobody else
could meet him all of a
sudden the the dam broke and
we started talking a little bit
we got together as you know
twice get along very well but
we were in no danger from
them and we were uh in
serious danger before i got
there you would i'm telling
you you would have had a
nuclear war if hillary clinton
got in i that's i'm so curious
like what this conversation
with with really powerful
world leaders looks like
behind closed doors like is it
is it candid or do you exercise

grace or you talk everyone's
different no but everyone's
different it's like uh when
you're talking to people when
you're doing interviews with
people when you're fighting
people they're all different
you know you fight them a
different way you talk to them
a different way but everyone's
different but i had very good
relationships with everyone
the funny thing is i got along
with the tough ones much
better than i got along with
the weak ones had some real
weak ones too i didn't get
along with them as well it's

strange must be personality
good thing huh it's probably a
good thing that you go get
along with them i get along
with theough leaders of the
largest countries you know
there's a very tough one victor
orban and he's the uh prime
minister of hungry and he said
that the reason the world is
blowing up because trump is
in president when trump was
there everybody respected
trump he said was afraid of
trump i don't want to use that
term because that's you know
i don't want to say oh they
were afraid like i child would

say but they respected me but
he said everyone listened to
trump they were afraid of
trump they couldn't figure
trump out and they all listened
and they did listen and we had
no wars we had no nothing i
defeated isis got rid of the
biggest terrorists ever maybe
or just about ever uh but we
defeated think of that we
knocked out isis 100% of the
isis caliphate and started no
wars i wasn't in any wars now
that i don't know how you
may feel about that because
you know you're a warrior
right cuz all fighters and

you're a real fighter by the
way it's not good it's not good
i i i i don't shy away from
conflict my fiance has a
problem with it it's not it's not
good you you do you're much
more diplomatic than i
probably would be you know
it's very interesting though so
khabib came up to me after
the fight the other night and
you know you guys would
probably say he's the best ever
maybe and you know
certainly he probably is and
very close right jon jones a lot
of people say and you know
and he said to me oh i hope

you can get in because we
have to stop the wars we have
to stop the killing the killing
he was so smart he
understood it and i think he's
friends or was friends but i
think he is friends with putin
very much yeah but uh he
said we have to stop the
killing and it's true and i think
i'd have that war stopped if i
was president-elect right after
the election if i win i will get
that war stopped i'll get it
stopped fast before i get to
office if it's not stopped
before then talking about
russia ukraine i'm talking

about russia ukraine we get it
we get it stopped so many
people are being killed far
more people are being killed
and i thought it was great
when kabib came up to me he
says we've got to stop all of
the killing in the world he's a
very smart guy very
interesting guy we talked for a
while on the flip side or on
the other side of the the uh
continent the gaza um
situation has been big news
over theast year or so you've
always the united states has
always been and you were
always a staunch ally of of

israel um has your sentiment
on netanyahu on his regime
changed at all in light of any
of the events of the past six
months no look they it it was
a shame that it should have
never happened it would have
never happened iran was
broke when i was president
nobody was allowed to buy
oil nobody was allowed to
buy anything they were broke
a democrat congressman uh
on deface the nation the show
deface the nation ladies and
gentlemen it's deface the
nation yes commonly known
as face the nation but i don't

call it that you have a name
for i think i have a more i
have a name for everything i'll
end up with a name for you
two guys by the time but it'll
be i can't wait to hear no no
there'll be good names there'll
be good names but uh so he
was on the show and he said
uh whether you like trump or
not iran was broke during
trump's they they would have
made a deal within one week
and now they have \$250
billion we would have had a
deal done in one literally in
one week after the election
and it was ready they were

absolutely and they had no money for hamas they had no money for hezbollah they were broke stone c broke now they have \$250 billion biden took off all of the sanctions he took he let them go china went to town i told china if you buy one barrel of oil from these people you're not doing any business with the united states they took a pass no oil and other countries likewise and we would have had a deal would have been a great deal for everybody we would have had a deal now they have \$250 billion they made it all

in three years three and a half years they made it all during this biden term i mean he gave him \$6 billion for five hostages right you saw that recently a couple of months ago \$6 billion for five hostages uh he made the swap the uh prince of terror they call him he's the best arms dealer ever they say who knows what that means but he was a great arms dealer for the basketball player that wouldn't uh stand up during the national anthem she thought that was a good time to tire sneakers and that was

not exactly the greatest trade
but he gave \$6 billion dollar
on top of every six billion
billion with a be and they
don't know what they're doing
and when you do that you
know when you start paying
that kind of money a lot of
other people are going to be
missing all of a sudden they're
going to be missing and hey
let's make a trade and that's
already happening you just
can't do that i got 58 people
out we never paid any money
58 people 58 hostages we
never paid money because
once you pay money you're

going to be doing a lot in other words you're going to keep doing it so you can't do that this episode is sponsored by myself i sponsored it myself prime x guys we just dropped primex uh this is our biggest launch ever uh it is a million dooll treasure hunt so after you buy your bottle and you open it there's a code under the cap you scan the qr code on the side you enter the code on the cap on the website we made a custom app a custom portal that has access to a treasure map that leads to a million cash prize

it's a global treasure hunt it's huge it's a big deal there's 12 mat matte pieces excuse me you collect all of them and you could get access to win a million dollars also if you don't collect all all 12 mat pieces you can start collecting points each bottle gives you points uh the points are redeemable for free merch prime airpods uh special prime bottles and other cool stuff so check it out primex now hitting your favorite retailers back to the show i want to ask about money money in this country go

ahead uh i've had a very uh
fortunate career yeah i've
made i've made i've made
some money and more money
than you have thought
possible for sure right for sure
i know i know the kind of
money you make because i
know when you have a uh top
event or and your shows but
these events are doing
fantastically what you've done
is incredible yeah i'm very
blessed and and part of the
reason that i believe i'm
blessed is because of this
country and and and i think
uh in a way i'm kind of living

like the modern day american dream you know i had access to a phone and and could start my business and reach the entire world on this device so um excuse me did you guys start like separately me and jake yes no together oh you started so you started together together on youtube and did you branch out you each have your own well eventually cuz i went to college jake was still in high school he ended up dropping out i i i finished my first year it's an amazing two stories right yeah for sure who makes more money uh it

depends on the year it it
depends if jake has fights and
and it depends on when this
sells right here yeah yeah
yeah i think is that your new
drink that's good will yeah if
you if you make it i like it oh
thank you president no it's it's
got to be good it's got to look
something's propelling him to
fight world champions to a
draw right yeah yeah yeah
yeah we uh we actually made
this uh american prime
special for this episode it's a
hydration it's doing fine doing
well we did uh 1.2 billion last
year year to that's that's

fantastic but but but i again
i'm i'm i'm blessed to have
even just be able to say that is
insane but my question is um
for other young people in this
country who are who are
looking to get ahead cuz for a
lot of them times are tough
right now it's very tough what
what would you say to them
kids kids who want to pursue
their own own version of the
american dream and and and
try to um achieve their wildest
dreams and make it all come
true i would say very simply
honestly vote for trump
because with biden you're

never going to do it this
country is going to hell vote
for trump you know we're
doing great with youth we're
doing great with
africanamericans
with hispanic
americans through the roof
both of those groups with
women with men and with
young people were doing very
well but i say vote for trump
if you don't have the right guy
in the lead the country is not
going to you know if the
country doesn't do well it's
much harder to do even what
you do okay even what you

do so that would be a simple message i really and i really mean it actually the same opportunities he's had in america i've had as well my road has been a little bit rockier as we were talking about in my book the fifth vital um i spent uh eight years addicted to heroin um living on the east coast uh in what i considered you know i i think a lot of people considered so you were addicted correct wow i think a lot of people consider to be the great open see b can i see the book absolutely we're going to get

we're going to make this
sucker a bestselling book
there's a message there's a
mess no it's such an important
it's actually it's actually
already it's already best by
this book it's great it's that
was for you i believe i wrote a
message to you in there yeah
well i'm going to keep it but
it's such an important topic
yeah seriously that's so
important there's a lot of
people that are still kind of
wrapped up in that world and
i just want to ask you some
questions in in 2023 the deac
is more than 80 mill ion

fentanyl lace fake pills uh
12,000 pounds of fentanyl
powder um there's so many
people out there on the streets
right now without access to
resources with mental health
for mental health health care
uh reh rehabilitation centers
what's your plan to continue
to uh stem the the flow of
fentanyl into the country as
well as help the people who
have already fallen victim to
the opiate epidemic so when i
took over you know was drug
infested when i ran in 2016 i
ran on the border and i fixed
the border and i couldn't even

use it in 2012 in the campaign even though i got millions of more votes than i got the first time i couldn't talk about the border because i fixed it and i'd say to my people i want to talk about the border i was proud of the job we did we had it fixed it was really in good shape and drugs were at the lowest point in years and you know not only people drugs human trafficking which is such a horrible thing it's you think of it as like an ancient kind of a crime and it's it's bigger now than ever before because of

the internet you know the internet has made a lot of these things much bigger than they have ever been when you think of human trafficking mostly in women by the way people don't know that mostly in women where they put them in trunks of cars they have compartments it's so horrible and i had it down to a real to the lowest level just about uh i guess in recorded recorded times so what you have to do is you have to be very tough on that we had a deal on the fentol is pouring through i bought millions of

dollars worth of equipment
believe it or not they call it
sniffing equipment but
believe it or not the best thing
to find it you can spend
millions of dollars on
equipment and machinery to
find drugs coming through
like you know sort of finds it
the best thing is a german
shepherd born in a certain you
know that oh they're
unbelievable they can they go
right to it it's not even there is
no machine you they spend \$2
and a5 million dollars for
machinery and the dog is is
much better more dogs and

we we literally bred those dogs it's a very specific type of german shepherd from a certain part of the world it's it's the most incredible thing uh we worked very very hard on that i was with president xi it comes from china and it comes in through the southern so mexico's comes through the southern border and i was with president shei and i told you we got along great you know the the uh the co was step too far as far as i was concerned but we got along great and i said do you have a drug problem he said no they

give the death penalty in china if you sell drugs i said i'd like you to give the death penalty to people that are making fentol and sending it over to our country and he was going to do that and then we had the election result and of course biden never picked up that conversation i told them about it but he was going to give the death penalty if he did that you would have had this literally stopped almost stopped but we have to be very very strong at the border this is really this is a plague like and

you know the numbers they
they'd say 70,000 880,000 i
think it's probably 250 or
300,000 this is like a war
there's rarely a war i mean
how many wars we losing
300,000 people a year and
everybody knows a family i
know many families where
their children die and they're
not even addicted they take a
pill that's unrelated and it turn
it it's got a little bit of fentol
they say you can take the the
head of a needle and you just
put a piece on the and that's
enough to kill like 10 people
it's it is a really horrible thing

and i would have had china
uh giving their maximum
penalty they would not have
been sending it and i had a
deal worked out with
president shei but of course
biden didn't follow up just
like he didn't follow up on the
abraham accords which would
have been a great thing to do
so we have to be very tough
on the border and that
includes drugs as well as
people as well as well as uh
people not coming in from
jails and prisons and you
know mental institutions
which is which is happening

now now at at levels that nobody's ever seen before it's crazy how can it be good it's so bad and i i guess they're either stupid which they're not they hate our country or they want to get these people for votes a lot of people think that's that's the thing they want to get them for votes but the the destruction the damage that biden's done to our country by having 16 17 million people already in you know it's much more than they say it's probably 17 i it could be even higher than then in our country and these

are not people that are going
to make america great again
these are people that have a
lot of issues and we're going
to have a lot of issues as long
as they're here and we're
going to get them out we have
to get him out mr president i
got the 10-minute warning
from the team oh which is
now 8 minute uh let's let's uh
let him go a little longer it's
fine i like it is that okay uh
yeah let him go a little bit
longer okay okay look at
these two guys and then it'll
turn out to be a lousy show
and i'll say you were right

jason it'll be good uh so go for
another 20 minutes is that all
right okay go ahead thank you
jason it seems to be a nice
flow right go well you did
reality i'll be in trouble with
my people like biden says oh i
i don't have that problem but
well first of all he would
never he's he couldn't do this
interview we you asked them
questions like this no we were
think we were talking about
that we were like we we'd like
to extend the inv to joe biden
if he'd like to come on this
podcast yeah i think he should
you know what chance you

have of getting him on i'd say
less than 1% okay if you did
that it'd be i'd actually watch
that one okay see how long it
lasted so the there are two
questions i have to ask the
first one's kind of fun aliens i
want to talk to you about
aliens ufos uaps the disclosure
we've seen in congress
recently it's it's it's confusing
and upsetting a lot of
americans cuz something
going there's something
happening there are
unidentified aerial phenomena
in the sky we don't know what
they are do you so it's such a a

question i do get a lot and it's
such an interesting question
i've met with pilots that look
just like you actually okay
they have more of a crew cut
okay they they look like him
and they look like you some
of them look like you a little
fatter but these are perfect
people okay and they're not
you know conspiratorial
they're not crazy and they tell
me stories that they've seen
things that you wouldn't
believe these are not people
that you would say ge
president of united states i
said who is it that's joe biden

wanting to do an interview uh
so i've met with pilots like
beautiful tom cruz boller okay
handsome perfect people sir
there was something there
that was round in form and
going like four times faster
than my super jet fighter
plane and i look at these guys
and they really mean it yeah
and am i a believer no i
probably i can't say i am but i
have met with people that are
serious people that say there's
some really strange things
that they see flying around out
there and you know if you go
to nevada and you look at that

little section of of uh where
where they go to look at uh
the aliens where they think all
the aliens are land that you
know it's one of i think it's a
maybe the number one tourist
attraction in the united states
roswell yeah yeah roswell it's
i think it's the number one it's
the lines of people waiting it
you have no idea how many
times i'm asked that question
but don't you have access to
that information i have access
but and i i speak to people
about it i've had actually
meetings on it and they will
tell you there's something

going on when they say things
things are going four times
faster than my beautiful
topof-

the-line airplane that goes
you know real fast with no
identifi propulsion system
right these things are creating
their own gravity fields
allegedly well they they have
they have uh people that are
very smart and very solid
have said they believe there is
something out there and you
know makes sense that there
could be i've never been
convinced even despite that
you know i just for some

reason it's not my thing but a lot of people believe that it's true a lot of very good solid people believe it's true what and you have i know there are illegal aliens out there but those are the ones that come through the border we have plenty of them those are the ones i know when you say aliens i say are they illegal aliens these are these might be illegal but we don't want to test them yeah because if they can go four times faster we're not going to test them uh so it's an interesting question yeah yeah for sure is there a

chance that one of these orgs
is potentially hiding
information from you about
aliens um um i guess so it's uh
you have the deep state and
you do have a deep state and
certainly they could but i don't
think on this subject i was
interested in it because i've
been asked so many times and
i i talked to people that have
said that they've you know it
was a sighting and it's uh very
believable it's it's very
possible that there is
something and why wouldn't
there be you know you take a
look at the universe and you

see all of the different planets
and you see this you know
look here we are on one
relatively small planet why
wouldn't there be on on a
planet that's you know 400
times the size why wouldn't
there be some something
somebody uh so you know it's
certainly believable to me the
thought of it freaks me out
you know it's it's weird to
think that we potentially are
only the source of life in like
an infinite ever expanding
universe um but but you know
technology but they'd never
be able to take you in a fight

no chance i'll bet on you no
chance send me in i'll better
send me in send me in my
brother we'll handle it that's
that's a good team it's we don't
if we don't come back i'm sure
we be the two of you will
come back and say hello say
hello to him by the way great
guy maybe maybe elon could
get you guys there you're fan i
think elon might be good for
this question he's he's a
terrific you know i looked at
the ship that went up the
spaceship and i never saw this
before i saw this is you know
like two years ago i see the

motors coming down the
engines coming down no
wings no anything in the i say
what is going on yeah and
nobody ever saw that before
and if you didn't have him
you probably wouldn't be
seeing it you know and i
called him i said what's that
he says well we want to be
able to reuse the engines i
said they don't have wings
they don't have anything and
they're landing on a platform
in the middle of the ocean i
said how cool is that i was i
thought i saw it all but that
was now he's a very uh he's a

spectacular guy well i mean
between paypal nurlink
starlink tesla spacex uh and
other things yeah he's
probably one of the greatest
minds of our time a very big you
know that's what i wanted to
ask about it was the second
question because you know
technology is improving at
a rapid pace at a pace
humanity has never seen
before and the most recent
development in technology
that is alarming but also cool
is artificial intelligence ai
yeah um i think it's going to
be eventually to a point where

we're not able to tell what's real and what's fake the era of truth i believe is probably slowly unfortunately coming to an end unless you come with receipts um what do you think the government's role in enabling protecting or governing ai should be in general should this superpower become what we believe it probably will be well it is a superpower and you want to be right at the beginning of it but it is very disconcerting i said you know you use the word alarming it is alarming ing when i saw a

picture of me promoting a product and i could not tell the voice was perfect the lips moved perfectly with every word the way you couldn't if you were a lip reader you'd say it's absolutely perfect and that's scary in in particular in one way if you're the president of the united states and you announced that 13 missiles have been sent to let's not use the name of a country we have just sent 133 nuclear missiles heading to somewhere and they will hit their targets in 12 minutes and 59 seconds and you're that

country and there's no way of
det you know i asked elon is
there any way that like russia
or china can say that that's not
really president trump he said
there is no way they'd have to
rely on secondary first alert
no they have to rely on a code
that if you don't have a certain
go who the hell's going to
check you got like 12 minutes
and let's check the code ge
how's everything doing so
what do they do when they
see this right they have a
maybe a counter attack uh it's
so dangerous in that way okay
in another way it's so

incredible that what they do is so incredible i've seen it i just got back from san francisco i met with incredible people in san francisco and we talked about this this subject is hot on their plates you know the super geniuses and uh and they gave us they gave me \$12 million for the campaign which you know four years ago they probably wouldn't have we had thousands of people on the streets you saw it it was just happened this last weekend y i met with incredible people actually and this is their big this is what

everyone's talking about with all of the technology these are the real technology people they're talking about ai and they showed me things but i've seen things that are so you wouldn't even think it's possible but in terms of copycat now to a lesser extent they can make a commercial i saw this they made a commercial me promoting a product and it wasn't me and i said did i make that commercial did i forget that i made that commercial it is so unbelievable so it brings with it difficulty but we have to be

at the for it's going to happen
and if it's going to happen we
have to take the lead over
china china is the prim ar
threat in terms of that and you
know what they need more
than anything else is
electricity they have to have
electricity massive amounts of
electricity i don't know if you
know that in order to do these
essentially it's a plant and the
electricity needs are greater
than anything we've ever
needed before to do ai at the
highest level and china will
produce it because they'll do
whatever you have to do

whereas we have environmental impact people and you know we have a lot of people trying to hold us back but uh massive amounts of electricity are needed in order to do ai and we're going to have to generate a whole different level of uh energy and we can do it and i think we should do it but we have to be very careful with it right we have to watch it but it's uh you know the words you use were exactly right it's a words a lot of smart people are using uh you know there are those people that say it takes over it

takes over the human race it's really powerful stuff ai so let's see how it all works out but i think as long as it's there see how it plays out and that's just and that's just ai what when what about when it becomes si or super intelligence yeah yeah know then they have super ai right super duper ai but but what they what it does is so crazy now it can also be really used for good i mean things can happen i had a speech rewritten by a out there one of the top people he said oh you're going to make a speech yeah he goes click

click click and like 15
seconds later he shows me my
speech that's c that's crazy so
beautifully i said i'm going to
use this sucker i'm gonna i'm
gonna i've never seen
anything like it what did you
say to your speech writer after
that you fired you fired yeah i
said you fired vince get the
hell out no no this was so
crazy it took it and it made it
unbelievable and it's it's and
so fast it's you just say i'm
writing.
